# Facilitating Electronic Assessment of Mathematical Sciences

by Dr Jared ONGARO

School of Mathematics, University of Nairobi, Kenya

Homepage: <https://profiles.uonbi.ac.ke/ongaro>

Electronic assessment of mathematics is becoming a necessity in recent times, but still comes with limitations. A key question is how to design online tests that assess mathematical knowledge in a valid way.

This talk is based on my experience in implementation of electronic assessment at a big university in Africa. I will share arguments in support, opportunities as well as the main challenges of electronic assessment in mathematical sciences.
